

## R290 Industrial Water Chiller

### CONTEXT

**Customer** STEF

**Activity Area**

Frigorific warehouse

**Localisation** Valence (26, France)

**Year** 2017

**Equipment provided**

EKO.E/MT-B/ST/SP 2002

**Description de l'équipement**

Industrial water chiller, air cooled unit

Natural refrigerant R290

**Cooling Capacity**

308kW | -4°C/-8°C @+35°C

### OUR CUSTOMER

STEF, a European specialist in cold logistics for temperature sensitive and agrofood products asks to CTA for the development of a unique and high efficient solutions under natural refrigerant R290.

Committed in an important Corporate Social Responsibility, STEF has choosen CTA to cool down his important logisitc warehouse in Valence (Drôme, France).

With a cooling capacity of 308kW/88rtons with -4/-8°C @ 35°C ambient temperature, this industrial water chiller allows an optimal thermodynamics performance with 2 inverters on Frascold industrial screw compressors R290 which permits high level of performance (ESEER, EER, and IPLV) in any conditions.
