drives (30Hz to 60Hz).

*Double hydraulic pump.

*Operates down to -20°C ambient.

Total capacity :

156KW | 40°C/45°C @+7°C

THE CUSTOMER

The Vignerons de Buxy cooperative winery brings together 272 family-run operations and embodies the winegrowing expertise of the Côte Chalonnaise. Since 2018, these wines have been marketed at Maison Millebuis, a vast space dedicated to tasting and wine tourism, offering visitors immersion in the world of renowned appellations such as Givry, Mercurey, Montagny, Rully and Santenay.

To ensure optimum comfort for visitors and professionals, the PAC HERA of CTA was installed to guarantee air conditioning and heating for the sales area and seminar rooms. Thanks to this high-performance, eco-responsible technology, Maison Millebuis benefits from precise temperature control all year round, enabling it to welcome its customers in the best possible conditions.
