Description of the equipment :
Propane R290 chiller
Air cooled
*VFD on compressors

Total capacity :
1 170 KW | -8°C/-4°C @+38°C

THE CUSTOMER

The Panhard Group has delivered a 48,000 m² logistics platform on a 10.6 hectare plot in the Haut des Prés business park in Brie-Comte-Robert (77).

The 6 cells of this warehouse were leased by ALDI, including 6,000 m² of temperature-controlled units (0-4°C), maintained by 2* R290 EKO.E/MT-B/ST/AS 4202 V CTA units.

This latest-generation cross-dock building is particularly bright, with a clear height of 10.80 metres. It comprises 2 central cells of 12,000 m² and 4 peripheral cells of almost 6,000 m². It also includes 820 m² of office and social space, as well as a 47,200 m² double-sided warehouse.

CTA's negative cold installations ensure that the cold rooms are kept at a constant temperature to guarantee the quality and preservation of the goods.
