

CONTEXT

Customer : PRUVOST LEROY

Sector of activity :
AGRI-FOOD

Location : Saint Hilaire en Cottes

Year : 2021

Equipment installed :
EKO.E MT-BS-I/ST/AS 1102 SE

Description of the equipment :

Propane R290 chiller

Air cooling

*Condenser treatment

*VFD on compressors

Total cooling capacity :
128 KW | -6°C/-2°C @+35°C MPG

THE CUSTOMER

Pruvost-Leroy specialises in livestock farming, live animal trading and meat production. Thanks to its slaughterhouse, La Douaisienne d'Abattage, the company slaughters over 12,000 tonnes of cattle every year, making it an essential link in the industry.

As part of its drive to optimise its infrastructure, for the second time Pruvost-Leroy is installing an R290 refrigeration system from CTA to supply a negative-temperature storage chamber, guaranteeing optimum preservation of the meat and compliance with the strictest health standards.
