

Denis
Meunier
V I G N E R O N

CONTEXT

Customer : Denis MEUNIER

Sector of activity : Wineries

Location : Vernoux sur Brenne

Year : 2022

Equipment installed :
Winechill 20C2 PC

Description of the equipment :
Reversible cooling unit
*Double pump
*Air cooling

Total capacity :
53kw | -4°C/8°C @+35°C

THE CUSTOMER

Based in Vernoux-sur-Brenne, in the heart of the Vallée de Cousse, winegrower Denis Meunier runs a 15-hectare vineyard. Committed to quality and respect for tradition, he strives to produce exceptional wines, implementing modern solutions to optimise every stage of the winemaking process.

As part of the construction of a new winery, Denis Meunier entrusted us with the design and installation of a multi-purpose reversible chiller. This machine, which is integrated into the cooling network of the wine vats, can go down to -4°C and is equipped with two automatic changeover pumps, guaranteeing efficient and safe temperature management throughout the winemaking process.
