Investment product specialists

Location : Bourg en Bresse 01

Year : 2025

Installed equipment :
DXA 0075

Description of the equipment :
Direct expansion air dryer

Processing capacity :
75 m³/h

THE CUSTOMER

Gérard Perrier Industrie, a manufacturer of customized industrial electrical and electronic equipment, designs and produces solutions dedicated to the automation and power supply of industrial machines and processes. To ensure the reliability and performance of its installations, the company required completely purified compressed air to supply its production workshops.

CTA provided a DXA 0075 direct expansion refrigerated air dryer capable of handling 75 m³/h, delivering a solution perfectly tailored to the plant's specific needs. Thanks to this installation, the compressed air is stable and of high quality, which protects the equipment, ensures smooth process operation, and helps maintain an optimal level of performance.

Through its expertise, CTA has enabled Gérard Perrier Industrie to strengthen the reliability of its operations and secure production, demonstrating the added value of customized solutions in a demanding industrial environment.
