IPC 301 SP

**Description of the equipment :**  
Water cooler for indoor  
installation

**Total capacity :**  
75 kW | 20/25°C @+35°C

### THE CUSTOMER

Promatec, a specialist in cutting oil filtration, is a company based in Scionzier (France, Haute-Savoie) currently expanding its international presence. As part of this growth, a cooling unit was installed in a screw machining workshop in Slovakia. This system maintains a constant cutting oil temperature, ensuring optimal tooling precision while reducing the risks of overheating and fire.
