

DRAGO
PARIS

CONTEXT

Customer : DRAGO PARIS

Sector of activity :
Foundry

Location : PALAISEAU (91)

Year : 2025

Installed equipment :
IP A IN/ST/**/OO/OO 0031

Description of the equipment :
*R410a refrigeration unit

Total capacity :
12,5 kW | 15°C/20°C @°35°C

THE CUSTOMER

Originally specialized in the creation of military insignia and objects, Maison Drago Paris has gradually diversified its expertise to become a true Designer Goldsmith. Since 1803, the company has produced all French civil and military decorations, from the simplest designs to the most prestigious, such as the Legion of Honour and the National Order of Merit.

As part of its development, Maison Drago Paris equipped its new enameling furnace with a high-performance cooling system supplied by CTA. The installed equipment, an R410A chiller (IP A IN/ST/**/OO/OO 0031), ensures precise temperature control, guaranteeing the quality and safety of the decoration manufacturing process.

This solution enables Maison Drago Paris to combine technical performance and reliability, while optimizing the energy efficiency of the installation.
